

**DVD content of numeracy practice sheets and videos mainly suitable for P1, P2, P3** that are available to download individually from the website, all for **‘starting’ Curriculum for Excellence level 1**.

**School use;** teachers can display any of the practice sheets on a smart board and use as the basis for an interactive lesson, and some time later, print out and copy for pupils to use as a practice sheet. The videos can also be shown on a smart board, and paused at any time for discussion.

**Home use;** Tom Renwick’s Maths on Track practice sheets (and their 5-14 predecessors) are used in many Scottish schools. They provide children the opportunity to practice key numeracy skills, quietly and supportively, at home. The videos give parents and their children direct access to the highly visual and effective techniques that Tom has been asked to share in over 500 Scottish schools with teachers and their pupils.
